ELEVATOR TRACTION MACHINE

EDENS using six types of machines, they are * Bottom Traction M/c.
* Single Shaft Traction M/c. * Machine Roomless * Gearless Permanent Magnet
* Over Speed Governor With PMS Motor.
Our machine are specially designed for various application such as speed and capacity with rigid & rugged reliability, smooth trouble free operation. We use standard worm and worm gears with taper roller bearing and thrust bearing in machine for maximum load carrying capacity.
The perfect lubrication system gives longer life and smooth operation. The machine are mounted on special type of Nitrite rubber which have extra ordinary dumping capacity, due to this characteristic, the machine runs vibration free.
